Beyond the Summer of 2012

Students who successfully complete the summer program will be encouraged to get involved with undergraduate research, internships, etc. The experiences they have during the summer will give them a head start on pursuing these extracurricular activities. There will also be opportunities for some of the participants to serve as mentors in the summer program in later years when they are sophomores or juniors. While they serve as mentors, they would conduct research of their own as they prepare for their chosen career.
Introduction

The Summer Enrichment Program in Science, Technology, Engineering, and Mathematics is a program open to any admitted freshman at Bloomsburg University who declares a major in the College of Science and Technology. The program will be targeted to majors in chemistry, biology, geoscience, mathematics, physics, engineering, and computer science.

One of the major components of this program is the 6-week session beginning the first week of July 2012. Students will be able to get ahead in their major by taking two classes and getting to know several of their professors and fellow science majors.

The Summer Immersion Program

The summer program will be held from July 2 to August 10, 2012. Students will be housed on the campus of Bloomsburg University throughout the six week term.

On the first day, there will be special welcoming activities for students and parents. There will also be a closing picnic for students and parents on the final day.

Monday through Thursday Schedule:

- Take two morning classes
- Participate in math and science workshops on alternate days
- Have guided homework sessions with tutors

On Fridays, the group will go on field trips to area labs, environmental sites, etc.

Cost

- The cost is the same as for taking two summer courses and staying in campus housing, so participants get the extra experiences at no additional cost. This includes the field trips, tutoring, and workshops.
